

MAXWELL WEIL

maxwellswell87@gmail.com | 509.222.4877 | Seattle, WA

SUMMARY OF QUALIFICATIONS

- Data science focused master's student with an interest AI and machine learning
- **Languages:** Python, R, SQL, MATLAB, HTML/CSS

EDUCATION

UNIVERSITY OF WASHINGTON

M.S. in Information Management, Specializing in Data Science

Sept. 2020 – Present

Seattle, WA

UNIVERSITY OF WASHINGTON

B.S. in Bioengineering, Minor in Neural Computation and Engineering

Sept. 2016 - June 2020

Seattle, WA

- Graduated Cum Laude and with Departmental Honors

PROFESSIONAL EXPERIENCE

UNIVERSITY OF WASHINGTON INFORMATION SCHOOL

Informatics Senior Capstone Teaching Assistant

Jan. 2021 – Present

Seattle, WA

- Conduct weekly check-ins and office hours to assist students with capstone project development through Miro
- Manage course website content, give feedback on student projects, and provide general support
- Monitor progress of teams while granting mentorship and additional guidance as needed

UNIVERSITY OF WASHINGTON INSTITUTE FOR NEUROENGINEERING

Postbaccalaureate Fellow in Neuroengineering

June 2020 – Sept. 2020

Seattle, WA

- Managed a small group focused on designing and manufacturing parts for lab project
- Developed code using an existing MATLAB framework for testing electronics

UNIVERSITY OF WASHINGTON

Bioengineering Reader/Grader

Mar. 2020 – Dec 2020

Seattle, WA

- Courses included an introductory lab course and an advanced neuroengineering class
- Held office hours, graded lab reports and homework, and provided feedback to students
- Maintained remote correspondence with both students and teaching team members during quarantine

KEON RESEARCH

Research Analyst

Apr. 2019 – Mar. 2020

Seattle, WA

- Delivered reports on commercialization and IP potential of a variety of developing technologies
- Worked alongside team members to engineer products in rapid prototyping lab

NEURAL ENGINEERING AND REHABILITATION DESIGN LAB

Research Assistant

Jan. 2019 – Jan. 2021

Seattle, WA

- Designed and prototyped a tactile stimulation setup using Autodesk Inventor, 3D printing, and circuit board design
- Managed the simulation development team of research assistants
- Aided in creation of an artificial neural network through the Brian2 simulation in Python

PROJECTS

CARBON-INTELLIGENT API

Feb. 2021 – Present

- Developing Python based API using Flask for calculating carbon emissions of computational work
- Working remotely with team using git version control through GitHub

WEATHER FORECASTING MODEL

Jan. 2021 – Mar. 2021

- Used Scikit-learn, Pandas, SciPy, and NumPy Python libraries to make weather predictions based on historic data
- Conducted analysis using various machine learning models such as logistic regression, random forest, and kNN

MOVIE REVIEW DATABASE

Jan. 2021 – Mar. 2021

- Designed and implemented relational database model using SQL through Azure Data Studio
- Created several stored procedures, business rules, and views to complement database

BIOSCIENCE PYTHON TUTORIALS

Oct. 2019 – June 2020

- Worked with small team to design and implement a series of Python tutorials for bioengineering students
- Collaborated with team members by hosting in-person and remote meetings and utilizing GitHub version control
- Created tutorial based on personal experience with neural networks
